- *Selection of hardwoods and shrubs to enhance your wildlife plantings and attract pollinators.*

Brown County Land & Water Conservation Dept.

2019 Technology Way, Ste. 104

Green Bay, WI 54311

EVERGREENS

Colorado Blue Spruce (2-0), *Picea pungens*

Grows to 100 feet and is easily the most popular conifer. They prefer moist, well-drained soil, but are very adaptable to a variety of conditions. This tree requires a fairly large space on growing. Its attractive color, form and tolerance to a variety of conditions make it a popular and wise choice.

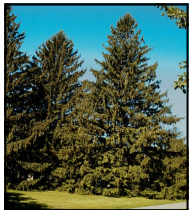

9-12" bare root stock \$30 per 25

White Spruce (2-0), *Picea glauca*

The striking blue colored foliage has made the White Spruce a popular landscape tree, and is also a favorite holiday tree. White spruce provides food and shelter for many species of wildlife. White Spruce grows in shade, but does especially well in sunny, open conditions and can reach heights of 60 to 80 feet.

9-12" bare root stock \$30 per 25

Norway Spruce (2-0), *Picea abies*

The Norway Spruce grows to heights of 80 to 100 feet, with a rapid growth rate while young and slowing down as it ages. Does best in well-drained, sandy soils. Prefer full sun. Is excellent as a privacy screen or as a windbreak.

9-12" bare root stock \$30 per 25

White Pine (2-0), *Pinus strobus*

This fast growing pine is distinguished from all other pines by the fact that its soft bluish-green needles occur in bundles of five. The seeds contained in the cones are eaten by red squirrels and birds. White pine prefers a sunny location and tolerates most moist, well-drained soils. This tree

9-12" bare root stock \$30 per 25

Terra-Sorb™ Synthetic Super Absorbent

Available: 1 ounce for \$2.50

~~Tubex® Tree Shelters~~

SOLD OUT

Available in 3' lengths (stakes included) — \$5.00 each

HARDWOODS

Swamp White Oak, *Quercus bicolor*

Swamp White Oak thrives in wet woods, swamps, wetlands, bottomlands, and near bodies of water, although it is very drought tolerant and can be planted in soils that are dry in summer. Swamp White Oak may reach 70 feet tall by 60 feet wide at maturity. Swamp White Oak has crimson shades of fall color.

12-18" bare root stock \$35 per 25

White Oak, *Quercus alba*

This native acorn-producing tree reaches heights of up to 100 feet. The White Oak prefers full sun or partial shade and grows in a variety of soil conditions. Trees 300 years old are not uncommon, and some have been known to live 600 years. Its fall colors range from bright red to dark brown.

12-18" bare root stock \$35 per 25

Bur Oak, *Quercus macrocarpa*

Burr Oak is a huge tree reaching a heights and spread of 70-90 feet and has an impressive crown, massive trunk and stout branches. The large acorns are almost completely covered with a furry bur-like cap. It is well adapted to alkaline soils, poor drainage, high clay content and is very drought tolerant.

12-18" bare root stock \$35 per 25

Tamarack, *Larix laricina*

Though the tamarack tree resembles other evergreens, it is actually a deciduous conifer, meaning that it sheds its needles every fall. It commonly grows in swamps and sphagnum bogs but also grows in upland soils. Tamarack grows well in full to partial sun and will reach heights of 70 feet.

12-18" bare root stock \$35 per 25

For more information call: (920)391-4620

EVERGREENS

Fraser Fir (P+1), *Abies fraseri*

This tree has flat, soft needles like the Concolor Fir but the Fraser Fir needles are shorter giving the tree a trim, crisp appearance. Growing 40 to 60 feet, this tree is popular for landscaping as Christmas trees and a cover for birds. Prefers sun but will grow on a variety of sites and soils.

7-12" bare root stock \$30 per 25

Balsam Fir (2-0), *Abies balsamea*

The Balsam Fir is a medium-sized tree generally reaching 40 to 60 feet in height. Does best on well-drained, sandy loam soils that are somewhat acid, it is shade tolerant and can establish itself under a canopy of hardwoods and conifers. The Balsam Fir is popular as a Christmas tree.

5-10" bare root stock \$30 per 25

Concolor Fir (2-0), *Abies concolor*

Also known as white fir, this dense pyramidal tree grows to heights of 50 feet. This rapid growing fir tree, once established, is the most drought-resistant of all native firs. Although it can exist on poor, dry sites, it grows most vigorously in moist, well-drained, acid soils in protected locations in full to partial sun.

9-12" bare root stock \$30 per 25

White Cedar (2-1), *Thuja occidentalis*

This hardy native reaches heights of 30 to 50 feet. White Cedar has a very attractive dark green color year round. This tree works well as a wind barrier and screen. This tree prefers full sun and moist, deep, loamy soils and will tolerate wetter sites. Extremely slow growing.

8-15" bare root stock \$30 per 25

SHRUBS

American Plum, *Prunus Americana*

Wild plum grows in dense thickets along sunny roadsides and fencerows, often amidst other trees or shrubs. Individuals can grow up to 15 feet tall. Wild plums provide excellent nesting habitat for many songbirds and cover for small mammals. Fox and other mammals eat the fruit and deer browse on the leaves and twigs. The fruit also makes excellent jelly and jam.

12-18" bare root stock \$35 per 25

Highbush Cranberry, *Viburnum trilobum*

Highbush cranberry grows in moist to medium-moist woods but it can tolerate full sunlight. This shrub reaches 10–13 feet in height. This shrub is an excellent late-winter emergency food source for songbirds, grouse, pheasants, wild turkeys, white-tailed deer, cottontail rabbits and small mammals.

12-18" bare root stock \$35 per 25

Red Osier Dogwood, *Cornus sericea*

A large fast growing shrub that can be found in moist to dry woods and thickets, forest margins, and other disturbed areas. Grown best on rich, moist, well-drained soils. Prefers full to partial sun. Will grow to 18 feet in height. Great wildlife species.

6-12" bare root stock \$35 per 25

American Elderberry, *Sambucus Candensis*

Elderberry is a showy ornamental with clusters of white flowers and red berries which attract a variety of songbirds. Elderberry is easy to grow but must be cross-pollinated to produce fruit, so plant two or more shrubs. Prefers full sun and moist soils, grows to 13 feet.

12-18" bare root stock \$35 per 25

For more information call: (920)391-4620

HARDWOODS

Black Cherry, *Prunus serotina*

Very fast growing in the seedling, sapling and pole stages; grows to heights of 50-60 feet. Tree bears dark green leaves which turn yellow to red in the fall and white flowers bloom in the spring. Fruit is edible. Does not tolerate shade, prefers open/fringe areas. Tolerates any soil except for the very wettest and very driest.

12-18" bare root stock \$35 per 25

Dolgo Crabapple, *Malus 'Dolgo'*

Excellent food source for wildlife—birds, turkey, deer—especially when used as part of a food plot. Grows in moist, well-drained, acid soil in full sun locations for best flowering. Not recommended for sandy soil due to drought intolerance, any other soil is suitable including some clay.

12-18" bare root stock \$35 per 25

Sugar Maple, *Acer saccharum*

Voted the Wisconsin State Tree in 1893, the Sugar Maple is a favorite shade tree with reliable fall color. It is valued for its hard, fine-grained wood. Found in the open, may easily grow to 80 feet tall. Sugar Maple thrives when it is planted into rich, moderately deep soils having even moisture coupled with good drainage.

12-18" bare root stock \$35 per 25

Whitespire Birch, *Betula populifolia* "Whitespire"

Extremely fast growing, reaching a height of 30-40 feet with an attractive pyramidal form, pure white bark, and glossy, dark green leaves. Is adaptable to a wide range of soil types. For an attractive birch clump plant 3-5 trees in a group. Resistant to bronze birch borer.
